Education

Woxsen University

B.Tech in Computer Science Engineering (AI & ML) CGPA: 8.3/10

2024 – 2028

Hyderabad, India

Experience

Symboynt

AI Engineering Intern

May 2026 – Jul 2026

Hyderabad, Telangana, India · Hybrid

- Shipped production applications by developing Python backend services, REST APIs, and RAG pipelines, integrating LLMs, SQL, and cloud infrastructure.
- Removed manual AI workflow steps by building multi-agent systems with LangGraph, LangChain, and OpenAI-compatible tooling that run end to end.
- Improved release reliability with MLOps practice: versioned experiments, evaluation, Git version control, and production deployment workflows.
- Aligned product and engineering by explaining technical tradeoffs to non-technical stakeholders, shipping features across both teams.

Woxsen AI Research Centre – Woxsen University

Software Engineering Intern

Jan 2025 – Aug 2025

Hyderabad, India

- Cut ERP deployment time **50%** (40s to 20s) by containerizing three microservices with Docker and tuning image caching and parallelization.
- Backed a production ERP platform serving **6,000+ users** by architecting Python backend services and REST APIs with Flask, PostgreSQL, and SQL-driven leave, holiday, and outing logic.
- Improved delivery reliability by implementing GitHub Actions CI/CD for automated testing, deployment, and database sharding and migration workflows.
- Shipped a production-ready leave management system on a six-member engineering team using Git-based development practice.

Woxsen University Student Council

Technical Secretary Lead

Mar 2025 – Mar 2026

Hyderabad, India

- Ran campus-wide digital transformation: **6 projects** and **4 internal tools** serving **2,000+ students** across 10+ organisations, built as student-facing websites, portals, and automation tools.
- Cut hosting costs **55%** by migrating vendor-managed services to self-hosted infrastructure.

Projects

pre-mortem

Python, FastAPI, Next.js, Postgres, pgvector, Hindsight, Laya | [live](#)

2026

- Built a decision-review agent for the Hindsight AI Agents hackathon, live at premortem.lexcontra.com: it searches company decision history, cites each precedent by id, and returns no verdict when no precedent exists.
- Measured intent routing instead of asserting it: Laya's domain probability separates chat, query, and decision classes before retrieval runs, with a decision-class message scoring 0.99.

69k.lol

Next.js, Convex, Stripe, WorkOS, TypeScript | [live](#)

2026

- Shipped 69k.lol end to end with live authentication, subscription billing, and a real-time backend on Next.js, Convex, WorkOS, and Stripe.
- Owned the stack 0 to 1: schema and API design, auth boundaries, billing webhooks, and production deployment.

featrs

Rust, Polars, Apache Arrow, GitHub Actions | [GitHub](#)

2025 – Present

- Built featrs, an open source feature engineering library in Rust, shipped as semantically versioned GitHub releases with CI on every change, using Polars and Apache Arrow for columnar ML preprocessing.
- Cut repeated preprocessing work by shipping scaling, encoding, feature selection, imputation, and missing-value handling as reusable components built on Polars expressions.

Technical Skills

Languages: TypeScript, JavaScript, Python, SQL, Rust, HTML/CSS
Frontend: React, Next.js, Tailwind CSS, responsive UI, GSAP
Backend: Node.js, FastAPI, Flask, REST APIs, RESTful services, Convex
Databases: PostgreSQL, MongoDB, Redis, pgvector
Cloud and DevOps: Docker, Kubernetes, K3s, GitHub Actions CI/CD, Nginx, Linux, self-hosted infrastructure
Integrations: WorkOS authentication, Stripe and Razorpay billing, AI SDK, third-party REST APIs, MCP
Practices and tools: Git, GitHub, Agile delivery, code review, AI development tools (Claude Code, Codex)

Achievements

Tensor v2.0 Hackathon	2025
<i>First Runner-Up, National Level Hackathon</i>	<i>Woaxsen University</i>
Sport Chanbara (Spochan), International Tournament	2023
<i>Represented India at the World Tournament</i>	<i>Tokyo, Japan</i>

Certifications

Data Protection Officer (DPO)	Certified
<i>Privacy and data protection compliance</i>	<i>Law and engineering</i>
